

Company policy regarding occupation health and safety, accident prevention

Main targets of the Company while performing works:

Allow no incidents which may harm one's health, lead to environment impact or cause property damage;

Create and maintain safe condition for performing operation tasks for all the involved employees.

Achieving set targets is based on the following conditions:

- preliminary assessment of work conditions, hazard identification and designing efficient and plausible measures of mitigating risks;
- personnel participation in risk assessment process and timely informing of safety measures;
- inviting qualified and experience personnel, training and knowledge check for maintaining safe work;
- creating safe operating conditions at facilities;
- monitoring technical conditions of equipment;
- screening and selection of suppliers and sub-contractors;
- unconditional adhering to the provisions of the applicable laws and industrial standards;

Company Management is committed to:

1. Implement and maintain HSE management system for safe operation.
2. Provide notification of employees of safety requirements for each project.
3. Design and update risk-reducing measures and check their efficiency.
4. Provide utilization of modern equipment and availability of necessary resources for safe operation.
5. Invite employees to participate in improving working environment and reward for achieved results.
6. Inform sub-contractors on safety requirements and monitor compliance with them during operations.
7. Examine achieved results in terms of maintaining work safety and make them available for Customers and Contractors
